

Fellow Model Car Hobbyists:

What follows is the inventory of one of the best collections of unbuilt model car kits I've ever seen. Its' owner, Gary Gollehon of San Diego, put a great deal of time in the 1970s and '80s building his ideal kit collection, then had to back off due to time limitations brought on by his career. He now wishes to offload his collection in advance of a relocation.

The kits count about 1122, with the majority being street rod and drag racing subjects. Many of the kits are factory sealed and pristine, and only *one* of the kit boxes showed notable damage. All of the kits listed are complete except where noted. Gary even put the decal sheets inside the instruction sheets and isolated the tires from the other plastic parts. These kits have been boxed for years and I, as their only recent 'visitor', was amazed at the condition and variety.

One last thing... this collection is to be sold as a group lot only. Only the most serious inquiries and offers will be entertained. **This is *not* a panic sale!** The kits' values are fully known by both Gary and myself; so excessive jive and extraneous B.S. will not be accepted. Payment for an agreed price will be by cash unless otherwise negotiated. Transport of the collection is the purchaser's responsibility. A knowledgeable buyer could turn the collection in individual sales and see a really nice profit.

So... look it all over, give it some thought, and call me at 714 404-2312 (9am-9pm pacific time) with any questions or comments.

Rick Rothermel

So there you have it. it took us over eight hours to count this stuff in Gary's garage on a warm June day, but I'm sure it's about 99% accurate. The boxes are clean and well preserved and the kits are complete except where noted. Gary has a huge array of Hot Wheels and Muscle Machines that would also be available. The kits are my area of experience, so that's the focus here.

Thanks for your time and consideration.
